

Dedicated Mine Surveying Package

# STUDIO SURVEY

**WHO USES STUDIO  
SURVEY:**

✓ Mine Surveyors

# STUDIO SURVEY

Studio Survey is a software solution exclusively designed for the needs of Mine Surveyors, both underground and open pit. It is not a module inside of a complex product, but a dedicated product that simplifies and streamlines the processing of everyday survey tasks in operations, mining any type of commodity.

## KEY BENEFITS

-  **Save Time**  
Time saving workflows and processes dedicated to Mine Surveyors.
-  **Dedicated Package**  
Stand-alone package with all features needed for every day tasks.
-  **Ready to Print Reports**  
In-built publishing & reporting tools.

## KEY TECHNICAL FEATURES

### Automated Reporting Tools

A dedicated suite of reporting tools and workflows for mine surveyors, including a Blast Volume Calculation tool, Compliance to Design, Compliance to Plan, Stope Reporting, Survey Memos and EOM reports.

### Purpose Built EOM Reporting

Dedicated EOM reporting process for both underground and open pit. Reducing errors and increasing efficiency by automating the production of the final report, including plotting and pdf generation.

### Compliance Reporting

Track the performance of you operation against design, plan/schedule and evaluate against the geology block model.

### Blast Volume Calculator

Easily create blast volume reports, track broken stocks in the pit and produce a blasting summary for a specified time period.

### Survey Memos

Easily create survey memos for underground operations and automatically maintain a survey memo register.
